

# LEAD Program

- Do your 5<sup>th</sup> and 6<sup>th</sup> graders love Science Camp at Chapel Rock?
- Do your students leave camp and talk about camp throughout the year, wishing they could come back?
- Have you noticed how much closer your students are after spending time on our ropes course?
- Are you interested in bridging the gap between grades and fostering a culture of leadership and mentoring in your school?

If you answered yes to any or all of these questions, please consider bringing your students out for our LEAD Program. This is perfect fit for 7<sup>th</sup> or 8<sup>th</sup> graders returning for a second year at camp.

Our LEAD program focuses on leadership and group development. Students will spend their first day at camp participating in ceremony, group culture building, and leadership style assessment, while having tons of fun. Day two will be spent all day on our amazing ropes course (both on the ground and in the air), pushing the limits teamwork and leading to a sense of accomplishment and self confidence.

Please ask about this program and we'll be happy to talk to you about it.
